

BODILY FLUID SPILL CLEANUP PROCEDURES

Ecolab Bodily Fluid Spill Kits help you comply with OSHA's Bloodborne Pathogens standard and Food Code requirements. The kit contains everything needed to safely clean, disinfect, and dispose of bodily fluid spills including written instructions, personal protective equipment (PPE), tools, disinfectant, and disposal bags. EPA registered Ecolab TB Disinfectant Cleaner quickly kills *Norovirus* and other pathogens and cleans while it disinfects.

For detailed instructions refer to the instructions included in the bodily fluid spill kit

1. Close Area

2. Put on PPE

3. Clean up spill

4. Disinfect Area*

5. Remove PPE

6. Dispose of materials

7. Wash Hands

8. Reopen Area

* Full disinfection is 10 minutes. Please refer to the "Precautionary Statements" section on the chemical bottle for further information on this disinfectant.
